EXPERIENCES

ASE-Trainee, Tata Consultancy Services Ltd.

Sep 2012 – Jul 2013

Worked in Navisys, the policy administration system of Sunamerica Annuities and Retirement Services. Gained knowledge about annuities. Worked mainly in maintenance and enhancement of this project. Maintenance activity involved solving any issue with transactions processing related to annuities. Enhancement activity involved any kind of enhancement to system required by Client. One of the major projects I worked on is Reserve Adjustment.
Technology Used: C++, Java, Oracle.

PROJECTS

Phoneme clustering based on acoustic-phonetic study of speech

Jul 2014 – present

Dr. P. K. Das, IIT Guwahati

The project aims to conduct acoustic and articulatory analysis for phonemes of languages. The main goal is to design a phoneme clustering algorithm similar to that of the "Soundex" algorithm, which is a text-based phonetic algorithm to encode the homophones to the same representation. This algorithm will be helpful for high quality multi-lingual speech recognition.

Internet of Things using Stigmergic Communication

Jan 2014 – Feb 2014

Dr. S. B. Nair, IIT Guwahati

The aim was to establish communication between heterogeneous devices using mobile agents. A PROLOG based mobile agent platform 'TYPHON' was used for inter-device communication. The network architecture and communication protocols was also designed.

HMM based Word Recognition System

Sep 2013 – Nov 2013

Dr. P. K. Das, IIT Guwahati

The aim was to make a system which takes a spoken word as input at runtime and outputs the recognized word on screen in real time. The spoken word must belong to a predefined set of words. Hidden Markov Models were built for the words. Techniques used for building the models are Vector Quantization, Durbin's Recursive Algorithm, k-Means clustering algorithm, Viterbi Algorithm.

Holistic approach in Bengali Character Recognition

Jul 2011 – Jun 2012

Dr. Tamaltaru Pal, ISI Kolkata

The aim was to read a scanned image of typed Bengali script and convert it to Unicode text format. Image data was read from TIFF file and skew detection, binarization, horizontal clipping and vertical clipping was applied sequentially to detect a whole word. Then different features were extracted from the words and the recognizer was trained based on those features.

PUBLICATIONS

- Paper on "Improving Services using Mobile Agents-based IoT in a Smart City" accepted in International Conference on Contemporary Computing and Informatics (ICCCI 2014), to be published in IEEE Conference Publications.

TECHNICAL PROFICIENCY

- Languages: C, C++, Java, PHP.
- Databases: MySQL, Oracle.
- Operating System Used: Windows, Linux.
- Tools: Eclipse, Visual Studio.

RELEVANT COURSES

- **M. Tech.:** Speech Processing, Mobile Robotics, Parallel Algorithms.
- **B. Tech.:** Artificial Intelligence, Soft Computing, Natural Language Processing.

POSITIONS OF RESPONSIBILITY

Teaching Assistant, IIT Guwahati   *Jul 2013 – present*

Working as TA for Speech Processing and Software Engineering Lab.

Batch Representative, M. Tech. CSE, IIT Guwahati   *Jul 2013 – present*

Working as Branch Representative, Member of CSEA.

Organizer, Flawless, Techno India   *Apr 2011,2012*

Conducted coding competition '*Flawless*' during Technical Fest *EDGE* for consecutive two years.

Batch Representative, B. Tech. CSE, Techno India   *Jul 2008 – Jun 2012*

Conducting activities like CSE-MEET, Fresher's Welcome, and Farewell.

ACHIEVEMENTS

- Got 99.9 percentile in GATE 2013 out of 224160 candidates.
- Secured Second position in Four Year B. Tech. Course, Techno India, WBUT, 2012.
- Won First Prize in "Geek-O-War", an AI programming competition on java, Techno India, 2012.
- Won Prize in "Robo-Race", a manual robotics competition, MCKV Institute of Technology, 2010.
- Won First Prize in "Steal It Away", an AI programming event on java, Techno India, 2010.
- Recipient of National Scholarship (Based On Merit List of Higher Secondary Examination, 2008) from Department of Higher Education, Government of India.

EXTRA CURRICULARS

- Enhanced IIT Guwahati placement portal. Added features like students data entry from csv file, automated mailing system using JavaMail API, updating eligibility upon student data update. Fixed student's eligibility bug having minor departments.
- Developed a database controlled ERP website for Ecifirm following MVC architecture having facilities like CRUD operation on products and customers, entering quotations, challans, tax invoices and purchase bills, report generation in pdf and excel formats and uploading data from excel file.
